Carrier Logistics has been providing software solutions to the transportation industry for over 35 years. **FACTS-ondemand** is Carrier Logistics' latest offering tailored to meet the needs of growing transportation companies who want the power of a robust web-based Freight Management System without the hassle and cost associated with ownership.

The screenshot shows the Carrier Logistics Inc. web application interface. It includes a navigation menu with options like 'Inbound', 'Outbound', 'Billing', 'Receivables', and 'Gen. Ledger'. A central section displays 'Consignee Information' for 'FEDERATED COOP LTD' with fields for 'Customer No', 'CUIDNO', and 'Log Out'. Below this is a table for 'Pieces' and 'Pallets' with columns for 'Pallets Hazardous', 'Description', 'Class', and 'Weight (lbs)'. A prominent text box in the center of the screenshot reads: **No long term commitment- pay as you go!**

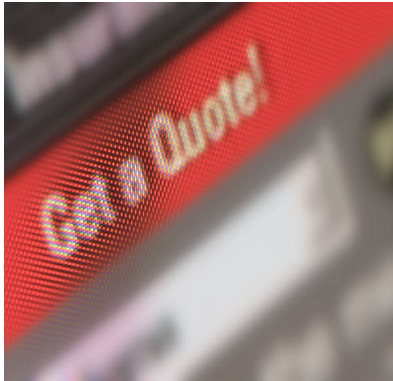

An easy way for your business to use Carrier Logistics' FACTS software without the added complexity and investment costs associated with owning an enterprise system. As a web-based, hosted solution, **FACTS-ondemand** will let you focus on managing business and not your IT.

## Product Information

# FACTS-ondemand™

*We manage the entire application for you...*

CLI's  
FACTS-  
ondemand™  
unites the power of  
a legacy Freight  
Management  
System with the  
simplicity of the  
Internet.
